PS3000 Scanning system

- Plug & Play, Simple to Install
- Fully Automatic profile tracking
- Manual Option of camera aiming
- Allows for Continuous reliable Temperature Measurement
- Tracking of individual profile-temperatures in Multi Cavity Die

Aluminum Profile

Features:

- Two Scanning modes:
 - Hottest point searching
 - Continuous scanning (pendulum mode)
- Adjustable scanning range up to $\pm 25^\circ$
- Adjustable scanning step from 0.1° to 5°
- Adjustable scanning time
- Minimal working distance 1 meter
Maximal working distance target size dependence

Metal Processing Application:

- Profile, Billet, Strip and bar.
